

# Blend Buzuku

## Software Engineer | Backend & Full-Stack Development

+38348113344 | blend.buzuku@outlook.com | <https://www.linkedin.com/in/blend-buzuku> | <https://github.com/blendbuzuku>

## Summary

Software Engineer with 4+ years of experience designing and delivering enterprise solutions across the banking, payments, ERP, and retail sectors. Specialized in financial applications and national payment systems involving SWIFT, SEPA, TIPS, ISO 20022, and interbank payment networks. Proficient in C#, .NET, ASP.NET Core, and SQL Server, with hands-on experience building secure, scalable, and high-availability systems. Strong background in system integration, workflow automation, and production support within regulated environments. Outside of work I build full-stack projects with Java, Spring Boot, and Angular, and I am currently learning Docker, Kubernetes, and cloud deployment.

**Languages:** C#, Java, TypeScript, T-SQL.

**Frameworks & Libraries:** .NET 8, .NET Framework, ASP.NET Core, Entity Framework Core, Windows Forms, WPF, React, Angular, Spring Boot, Spring Security, JPA/Hibernate.

**Databases:** SQL Server, PostgreSQL, MongoDB, Entity Framework Core (Code-First), Stored Procedures, Query Optimization.

**Tools & Platforms:** Git, IIS, Flyway, Swagger, Serilog, TPL Dataflow, MailKit, RDLC Reports.

**Concepts:** Clean Architecture, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Audit Logging, Structured Logging, File System Monitoring, Windows Services.

**Domains:** Banking & Payments (SWIFT, SEPA, RTGS, ACH, TIPS, ISO 20022), Core Banking, ERP Systems, Payment Gateways.

## Work Experience

### Best Vision Solutions & Services L.L.C.

SOFTWARE DEVELOPER

Prishtine, Kosovo

May 2026 - Present

- Developing ISO 20022-compliant payment system components.
- Developing and enhancing RTGS, ACH, and TIPS Instant Payment functionalities.
- Supporting testing and validation of payment processing workflows.
- Collaborating with cross-functional teams on payment modernization initiatives.

### ASEE by Asseco

SOFTWARE DEVELOPER | PRODUCT SPECIALIST

Fushe Kosove, Kosovo

Nov. 2024 - May 2026

- Developed a real-time TIPS payment monitoring system for Kosovo's instant payments initiative, detecting and forwarding transactions to the gateway within the mandatory 10-second window and generating ISO 20022 pacs.002, pacs.004, and pacs.009 messages.
- Designed, developed, and maintained mission-critical banking applications including Retail Management Systems, National Payment Systems, E-Banking, Mobile Banking, and Card Management Systems.
- Optimized complex SQL queries and database procedures to reduce transaction times and improve system throughput.
- Architected and deployed integrated solutions across IIS-hosted APIs, Windows services, and desktop applications for automated financial operations.
- Implemented audit logging for regulatory compliance and provided production support and root cause analysis.

### Selected Projects

#### Email Dispatcher API

- Designed and deployed a .NET 8 email orchestration service processing **500+ emails per minute** with **99.98% reliability**.
- Built parallel processing pipelines using **TPL Dataflow** and asynchronous database operations.
- Reduced delivery failures by **82%** through email validation and SMTP connection reuse.

**Technologies:** .NET 8, C#, SQL Server, SMTP, MailKit, TPL Dataflow, IIS, Structured Logging.

#### File Intake API

- Architected and deployed a secure RESTful API enabling merchants to submit financial files to the local banking sector.

- Implemented **JWT authentication, RBAC**, and comprehensive audit logging using Serilog.
- Applied **Clean Architecture** with separated controllers, services, repositories, and DTOs.
- Managed IIS deployment, production configuration, and troubleshooting in line with banking regulations.

**Technologies:** ASP.NET Core (.NET 8), C#, Entity Framework Core, SQL Server, JWT, Serilog, Swagger, IIS.

#### Swift Watcher

- Developed a Windows Service that monitored SWIFT acknowledgment files, processed XML data, and generated RDLC reports.
- Automated delivery of reports through the Email Dispatcher API and implemented bank-specific transaction fee calculations.
- Built a companion WPF configuration tool for managing service settings, validation rules, and database connectivity.
- Secured sensitive configuration data using **AES encryption** and implemented comprehensive logging for traceability.

**Technologies:** C#, .NET, Windows Services, WPF, XML, RDLC Reports, SQL Server, AES Encryption, File System Monitoring.

#### Swift Client Register

- Developed a Windows Forms application for client management in a banking environment with **role-based access control**.
- Implemented client onboarding, fee configuration, RDLC reporting, and admin modules for users, permissions, and settings.
- Built an email resend module with full audit trails and parent-child tracking of SWIFT confirmations for fee collection.

**Technologies:** C#, .NET Framework 4.8, Windows Forms, RDLC Reports, SQL Server, Entity Framework.

### KuBIT Solutions

Prishtine, Kosovo

SOFTWARE DEVELOPER

Oct. 2022 - Nov. 2024

Developed and enhanced business applications across BI, ERP, and restaurant systems, including query optimizations in legacy ERP and POS systems that reduced system latency by **25%**.

#### Selected Projects

##### Business Intelligence Solution

- Built a full-stack BI solution in React and ASP.NET Core with interactive, real-time business dashboards.
- Applied Clean Architecture, validation, and structured logging practices.

**Technologies:** React, ASP.NET Core, SQL Server, Data Warehousing.

##### Email Sending API Revamp

- Improved reliability with asynchronous processing, retries, SMTP failover, and rate limiting, cutting failed deliveries by **40%**.

**Technologies:** C#, .NET, SMTP, MailKit, Structured Logging.

## Side Project

#### BankFlow: Core Banking Application (Personal Project)

- Built a core banking web application simulating a retail bank on Kosovo's national payment system (KIPS).
- Designed three Spring Boot microservices behind an Angular front end, secured with JWT and role-based access control.
- Generated and XSD-validated ISO 20022 messages (pacs.008, pacs.002, pacs.004, camt.056, camt.053) for ACH and RTGS.
- Built a double-entry ledger with suspense accounts, pessimistic locking, four-eyes approval, and end-of-day balancing.

**Technologies:** Java 21, Spring Boot 4, Spring Security, JPA/Hibernate, Flyway, PostgreSQL, MongoDB, Angular, TypeScript, JWT.

## Education

#### UBT College

Prishtine, Kosovo

B.S. IN COMPUTER SCIENCE AND ENGINEERING
